NERA

The most compact and reliable solution for solar pumping applications

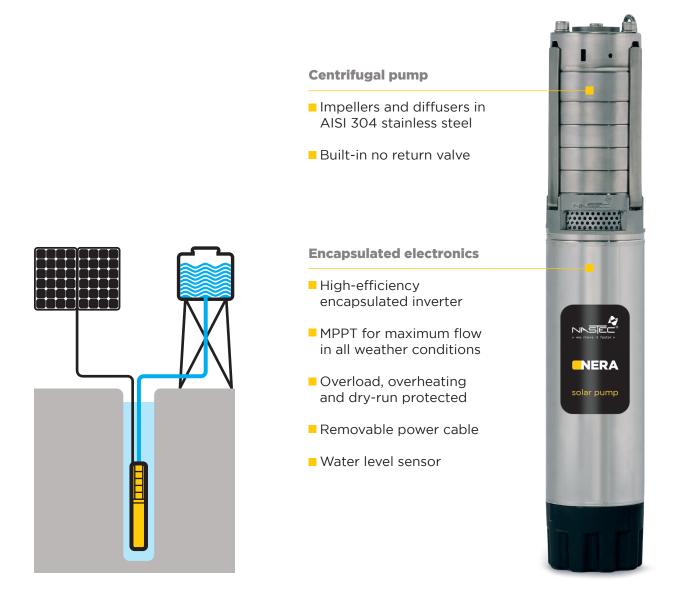

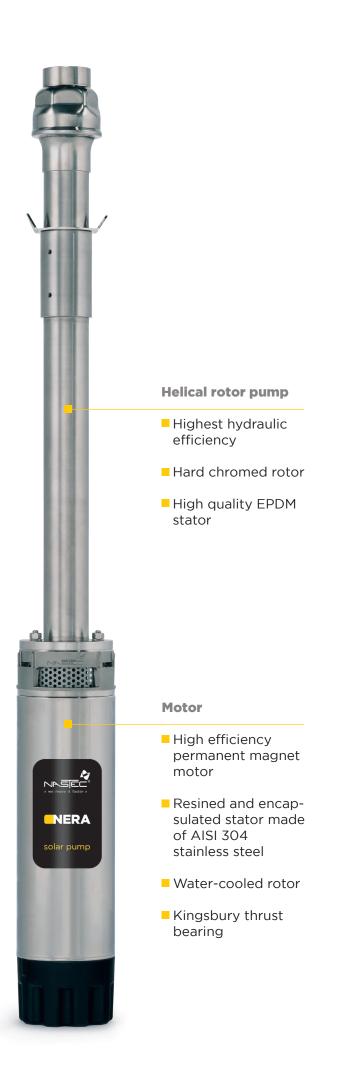

NERA solar pumps have been developed to meet the needs of low-power and low-cost pumping systems without sacrificing quality, reliability and performance.

For this reason, unique technological features are concentrated in NERA.

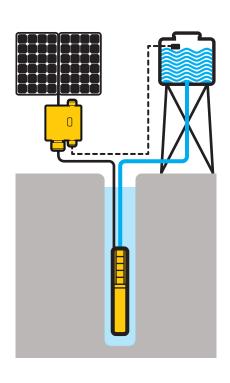

To connect NERA to the solar system, the STOP MODULE device is available as an accessory. It is equipped with:

- MC4 connectors for fast and easy panels connection
- Button for pump start and stop
- Connection for float or pressure switch
- Surge protection

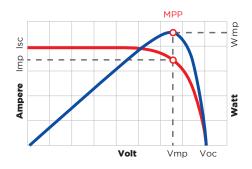

MPPT: always the maximum power available

Based on the varying conditions of solar irradiation and temperature, MPPT (Maximum Power Point Tracking) maximises the electrical power drawn from the panels and therefore the amount of water pumped. The greater the solar irradiation the faster the pump's rotation speed, and consequently water flow increases.

When solar irradiation decreases (due to clouds or the different times of day), the pump reduces frequency and therefore the flow, but it continues to provide water until the irradiation falls below a minimum level necessary to ensure operation.

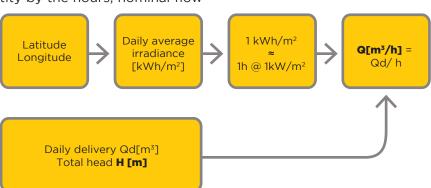

Pump selection

For the correct selection of NERA pump to be used in a photovoltaic system, it is necessary to know:

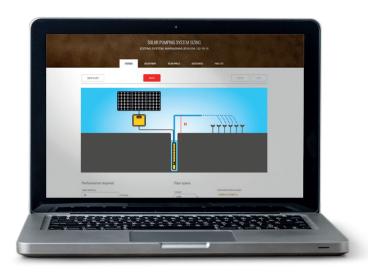

- Desired daily water flow
- Total head
- Installation location

Based on the location it is possible to calculate average daily radiation [kWh/m²/day]. Average daily radiation can then be considered as the number of hours the pump works with

1 kW/m², standard for defining solar panel performance. Dividing the required water quantity by the hours, nominal flow is calculated and, in addition to the required head, the right pump can be selected.

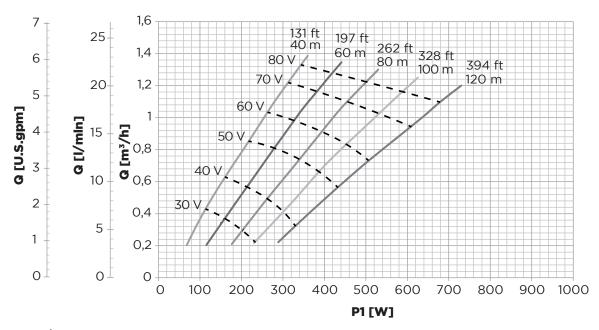

For a full sizing of your solar pumping system, it is recommended using Nastec Solar Calculator (NSC) at:

Performance NERA 01/02H

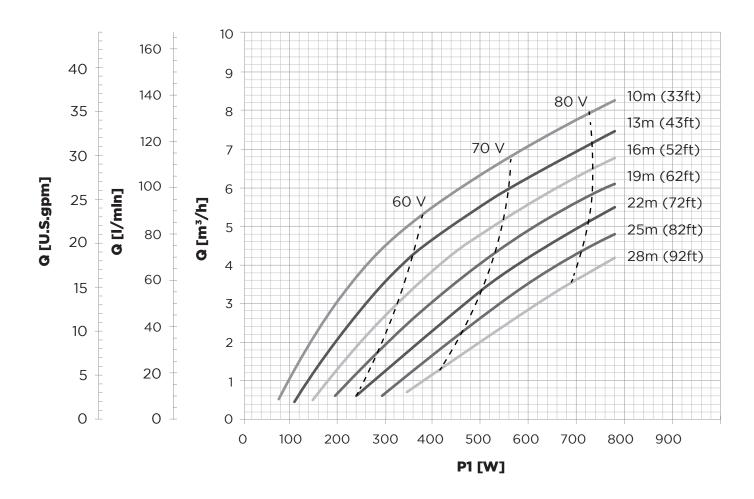

NERA 02/01H

Model	Voltage	Max current	Max power	Length	Discharge	Pump weight	Max diameter*	Packing dimensions	Total weight
NERA	[VDC]	[A]	P1 [W]	[mm]		[kg]	[mm]	[cm]	[kg]
01/02H	26 - 190	10	800	930	1 1/4 "	11	99*	77x21x26	13
02/01H	26 - 190	10	800	890	11/4 "	10	99*	77x21x26	12

^{*} Max external diameter including cable and cable cover

Performance NERA 06/04

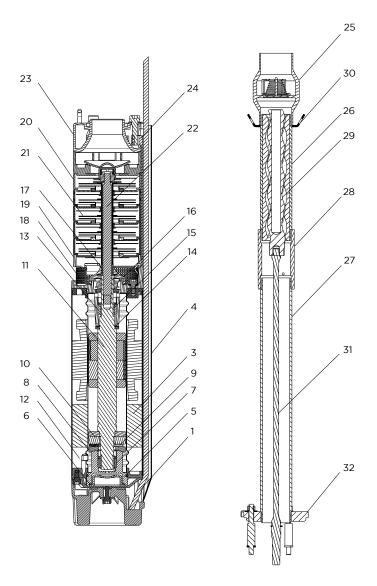

Model	Voltage	Max current	Max power	Length	Discharge	Pump weight	Max diameter*	Packing dimensions	Total weight
NERA	[VDC]	[A]	P1 [W]	[mm]		[kg]	[mm]	[cm]	[kg]
06/04	26 - 190	10	800	520	1 1/2 "	9	99*	57x21x26	11

^{*} Max external diameter including cable and cable cover

General specifications

Max liquid temperature	35 °C (92 °F)				
Min liquid cooling speed	0.2 m/s				
Characteristics of the pumped liquid	clean, chemically not aggressive, not explosive, without solid and fibre content, with max 50 g/m³ sand content				
Protection degree	IP68				
Maximum immersion depth	150 m				
Materials	Motor and pump in AISI 304 stainless steel				
Cable	Flat cable ACS - WRAS - KTM approved				
Certifications	CE				

Materials

Description	Material				
Power supply cable with removable connector for drinking water applications	AISI 304 + ACS-KTM-WRAS compliant				
E-Ring: Encapsulated inverter module					
Cable guard	AISI 304				
Lower thrust bearing	AISI 304				
Rubber diaphragm	EPDM				
Lower bush	SiC				
Tilting disc	AISI 304				
Pads	AISI420j				
Carbon disc	CTI25				
Shaft with rotor	AISI 431				
Canned type stator	AISI 304				
Upper bush	SiC				
Upper thrust bearing	Teflon				
Ceramized sleeve	AISI 304 + Ceramic				
Mechanical seal	SiC				
Rotating sandguard	NBR				
Pump filter	AISI 304				
Pump bracket	AISI 304				
fugal pump					
Diffusers	AISI 304				
Impellers	AISI 304				
Pump shaft	AISI 304				
Discharge	AISI 304				
Straps	AISI 304				
idal rotor pump					
No-return valve	AISI 304				
Helicoidal stator	EPDM + AISI 304				
Supporting pipe	AISI 304				
Junction	AISI 304				
Helicoidal rotor	AISI 316 cromed				
Safety hook	AISI 304				
Flexible shaft	AISI 316				
Pump adaptor	AISI 304				
	Power supply cable with removable connector for drinking water applications E-Ring: Encapsulated inverter module Cable guard Lower thrust bearing Rubber diaphragm Lower bush Tilting disc Pads Carbon disc Shaft with rotor Canned type stator Upper bush Upper thrust bearing Ceramized sleeve Mechanical seal Rotating sandguard Pump filter Pump bracket fugal pump Diffusers Impellers Pump shaft Discharge Straps idal rotor pump No-return valve Helicoidal stator Supporting pipe Junction Helicoidal rotor Safety hook Flexible shaft
